Isn't it a Fact?

That the greatest factor for the good of the public is the advertising of their business?

They are the leaders in making better business for the home town.

If some merchants would take the trouble to find out the amount of money sent to mail-order houses from the home town, it would give them an awful jolt.

It would wake them up to the fact that in order to compete with the mail-order houses they should use the same methods as used by the mail-order houses—

ADVERTISING!—The Magnet that Attracts

Mail-order houses appreciate the importance of advertising. That is why they get so much business. Heavy appropriations for advertising are necessary in their business. They make these appropriations and that is why they get rich at the expense of the local merchants.

If local merchants paid as much attention to local advertising as they should, the mail-order houses wouldn't do much business.

Wednesday is supposed to be the luckiest day of the week for a wedding.
